

FamilybridgeAI – Project Report

done by: Ibrahim Merchant
12-C

1. Introduction

These days, family members often have a hard time communicating with each other. They also struggle to stay organized, manage their tasks, and keep track of their budget. Sometimes important messages get misunderstood, household chores become a mess, and family schedules clash.

To solve these problems I created familybridgeAI, a platform that uses intelligence to help families communicate better, stay organized and manage their responsibilities. The platform also helps families track their health expenses, preserve their memories and strengthen their relationships all in one place.

2. Problems

Modern families face challenges:

- * Family members do not communicate well with each other.
- * Managing household chores is difficult.
- * Coordinating events and schedules is hard.
- * Tracking expenses is a problem.
- * Preserving family memories is not easy.
- * Family members do not interact with each other emotionally because they are busy.
- * There is no one place where all family activities can be managed.

The goal of this project is to provide an artificial intelligence solution that improves family communication, organization and emotional well-being.

3. Objective of my app

The main objectives are:

- * Improve the way family members communicate with each other.

- * Reduce misunderstandings between family members.
- * Organize household chores in a way.
- * Track family health expenses.
- * Manage schedules and events.
- * Preserve family memories digitally.
- * Use intelligence to assist family members.
- * Encourage interactions between family members.

4. Technologies Used

Technology	Purpose
-----	-----
Python	Main programming language
Streamlit	Web application framework
Google Gemini AI	Artificial intelligence features
PIL (Python Imaging Library)	Image processing
JSON	Data storage
Computer Vision	Image analysis
CSS	User interface styling

5. System Architecture

The system has integrated parts:

User Authentication System

↓

AI Communication Module

Family Messaging System

Chore Management Module

Memory & Activity Hub

Health Budget Tracker

Weekly Harmony Report Generator

6. Key Features of the modules

A. Secure Family Login System

Each family member gets:

- * Their own profile
- * A PIN
- * Secure login access
- * A private workspace

Benefits:

- * Personal information is protected
- * Each family member has an experience
- * Communication is secure

B. AI Workspace

This feature is like an artificial intelligence assistant.

Functions:

- * Family members can express their thoughts freely.
- * The artificial intelligence. Provides support.
- * The artificial intelligence gives suggestions and advice.
- * Messages are kept private.

Benefits:

- * Family members get support
- * Stress is reduced
- * Family members can express themselves better

C. AI Message Translator and sender

Purpose:

Sometimes people are not able to express their emotions or do it in a hurtful way when they are upset.

The artificial intelligence automatically converts:

From:

"Nobody ever listens to me."

To:

"I would really appreciate it if we could spend some time discussing this."

Benefits:

- * miscommunication is prevented
- * Family conflicts are reduced

- * Communication is improved
- * Conversations are more respectful

D. Family Message Feed

A family inbox where members can:

- * Receive messages
- * Read notes
- * Communicate respectfully

Features:

- * Messages are stored in a way
- * Each family member has an inbox
- * Communication is focused on the family

E. Smart Household Chore Board

This part helps manage family responsibilities.

Features:

- * Chores can be added
- * Chores can be claimed
- * Progress can be tracked
- * Reward points can be earned

Artificial Intelligence Integration:

The artificial intelligence evaluates how hard a task is and assigns points automatically. Also, to avoid cheating, the family member has to upload a picture of their completed chore to acquire their points

Example:

Task	Points
------	--------

-----	-----
-------	-------

Wash dishes	2	
-------------	---	--

Clean garage	5	
--------------	---	--

Fold laundry	2	
--------------	---	--

Benefits:

- * Tasks are distributed fairly
- * Family members are more responsible
- * Rewards motivate family members
- * Cheating is prevented
- * Family members are more accountable
- * Trust is built within the family

G. Shared Family Calendar

Allows family members to organize events.

Functions:

- * Events can be added
- * Reminders can be set
- * Milestones can be tracked
- * Upcoming activities can be viewed

Benefits:

- * Planning is better

- * Coordination is improved
- * Scheduling conflicts are reduced

H. Fridge Vision & Grocery Assistant

Family members upload a photo of their refrigerator or pantry.

The artificial intelligence:

- * Detects available ingredients
- * Suggests recipes
- * Creates grocery lists

Example:

Detected items:

- * Eggs
- * Milk
- * Bread

Suggested recipe:

- * French Toast

Missing items:

- * Cinnamon
- * Maple syrup

Benefits:

- * Food waste is reduced
- * Money is saved
- * Meal planning is simpler

I. Hugs & Love Tracker

A feature for emotional well-being.

Functions:

- * Family hugs can be logged
- * Positive interactions can be tracked
- * Stronger family bonds can be built

Benefits:

- * Affection is encouraged
- * Relationships are strengthened
- * Emotional health is improved

J. Family Heart Wall

An appreciation board.

Family members can post:

- * Thank-you notes
- * Appreciation messages
- * Encouragement

Example:

"Thank you for helping me with my homework today."

Benefits:

- * Gratitude is promoted
- * Positivity is built

- * A supportive environment is created

K. activity planner and Family Memory Book

AI plans your activities according to your prompt and a diary where family members can record:

- * Weekend activities
- * Special moments
- * Family achievements

Benefits:

- * Memories are preserved
- * A family archive is created
- * Emotional connections are strengthened

L. Budget Tracker

Tracks family expenses.

Functions:

- * Costs can be recorded
- * Receipts can be stored
- * Spending can be monitored

Benefits:

- * Financial transparency is improved
- * Budgeting is better
- * Expense management is easier

M.AI Receipt Scanner

Family members upload a receipt.

The artificial intelligence extracts:

- * Store name
- * Expense amount

and automatically logs it.

Benefits:

- * Data entry is done
- * Manual work is reduced
- * Records are accurate

N. Weekly Harmony Report

The artificial intelligence analyzes:

- * Chores completed
- * Family interactions
- * Hugs logged
- * Budget information

Then generates a family performance report.

Benefits:

- * Teamwork is encouraged
- * Family well-being is measured
- * Continuous improvement is supported
